PROFILE

Linus is an engineer and project management professional with over 25 years of extensive experience in the mining, mineral processing, smelting, refining and construction industries. His experience covers project management and maintenance management of heavy mining equipment, construction equipment, mineral processing plants, smelters and refineries. He has held management roles in copper, cobalt, gold, uranium, coal, ferrochrome and platinum industries on underground mines, open pit, open cast mines and mineral processing plants in South Africa, Continental Africa (covering Zimbabwe, Namibia, Tanzania, Mali, Ghana, DRC and Guinea), Americas (covering Argentina, Brazil and USA) and Australia.

Linus has been involved in project management, developing projects including plant designs from concept, pre-feasibility, feasibility studies to commissioning and hand over for major capital projects, stay-in-business and business improvement projects.

He has a Masters in Project Management with University of Pretoria, BSc (Hons) Mechanical Engineering degree, Government Certificates of Competency (GCC) for Mines and Works, Government Certificates of Competency (Factories).

His skills cover asset management, mining operations, mine and mineral processing plant development and designs, project evaluation, reviews, assurance and due diligence.

EDUCATION

MSc (Project Management) University of Pretoria	2012
BSc (Hons) Mechanical Engineering University of Zimbabwe	1993

CERTIFICATIONS, REGISTRATIONS, LICENSES

Government Certificate of Competency: Mines and Works (South Africa) (2010)

Government Certificate of Competency: Factories (South Africa) (2010)

Note: GCC certification allows legal appointment in accordance with South Africa laws (appointments as 2.13.1/2.13.2/2.16 e.t.c)

Project Management Professional (PMP): PMI (2014)

PROFESSIONAL MEMBERSHIPS

Association of Mine Resident Engineers (AMRE)

Project Management of South Africa (PMSA)

COURSES AND SEMINARS

APW – Anglo Projects Way

NOSA Safety Systems

ISO 9000, 9001 and 14000

CA-SuperProject (Project Scheduling and Control)

MS Projects (Project Scheduling and Control),

Write-Plan Planned Maintenance Package,

MIMS (an integrated information management system)

SAP (an integrated information management system)

BuildSmart (a construction management package)

DETAILED EXPERIENCE

Current: Director of Business Integrated Improvement Solutions (Pty) Ltd. (BIIS) Pty Ltd

Co-founder of Business Integrated Improvement Solutions Pty Ltd. BIIS is a firm of professionals offering management consulting, business improvement & business development services in the mining and metals, finance, ICT, government and municipalities, manufacturing and infrastructure **build industries.**

Director of Humba Resources Pty Ltd

Co-founder of Humba Resources Pty Ltd which provides services in the following areas: Physical Asset Management, Maintenance Maturity Assessments, Asset Management Strategy Formulation, Business Improvement interventions, Project Development and Management, Project Reviews, Evaluations and Assurance, Mine Due Diligence, Engineering Design and Reviews, Plant Inspections

and Regulatory Compliance, Power Purchase Agreement Advisory, Human Capital Development and Supply of consumables to the mining industry in Africa

August 2016 – February 2019: Head of Engineering: Eurasian Resources Group (ERG).

ERG is a diversified company with operations and interests in power generation, mining, mineral processing and logistics. In Africa, ERG has operations in the DRC and Zambia (copper and cobalt), development projects in Mozambique (coal), Zimbabwe (PGMs), South Africa (fluorspar and manganese), Mali (bauxite) and Brazil (iron ore). In Europe and Asia, ERG has power generation operation, mineral processing and smelting of ferrochrome. The operations of the Group comprise: the mining and processing of chrome, manganese and iron ore; the smelting of ferroalloys; the production of iron ore pellets; the mining and processing of bauxite for the extraction of alumina and the production of aluminium; coal extraction and electricity generation; and the transportation and sales.

Responsible for the Maintenance and Asset Management of all assets within ERG Africa operations.

Chairperson of the Power Strategy Committee with a mandate to secure economical and reliable power for the DRC and Zambian operations and growth projects.

Responsible for standardisation within ERG Africa. Chairperson of the Standardisation Committee for the company.

Member of ERG Africa Project Portfolio Committee; Enterprise Resource Planning (ERP) System.

At Anglo American Platinum

January 2016 – July 2016: Principal Engineering Manager: Mechanical- Anglo American Platinum, a Platinum Group Metals (PGM) mining, processing and marketing company with operations in South Africa and Zimbabwe.

Responsible for TMM (Trackless Mining Machines), winders, compressors, surface infrastructure, mineral processing plants and balance of plant equipment for underground operations and open pit mine (Mogalakwena).

March 2014 – December 2015: Principal Manager: Projects Review and Assurance – Anglo American Platinum, a Platinum Group Metals (PGM) mining, processing and marketing company with operations in South Africa and Zimbabwe.

At AngloGold Ashanti: July 2008 – March 2014 (5 years 9 months)

August 2013 – March 2014. Principal Advisor/Senior Manager: Engineering and Projects (Asset Management) – AngloGold Ashanti International Region covering Africa, Australia and the Americas.

Sept 2010 – July 2013 Project Engineering Manager - AngloGold Ashanti, Continental Africa Region-Mining Industry covering Namibia, Tanzania, Ghana, Mali, Guinea and DRC.

Jul 2008 – Aug 2010 Project Manager/Project Engineering Manager - AngloGold Ashanti Continental Africa Region - Mining Industry

At Power Construction: Feb 2004 – June 2008 (4 years 4 months)

Feb 2004 – June 2008: Regional Plant Manager - Power Construction (South Africa) Construction Industry

At Zimasco (PVT) Ltd: Oct 1998 – Jan 2004 (5 years 4 months)

Zimasco mines, smelts, processes and markets high carbon ferrochrome in Zimbabwe.

Jan 2001 – Jan 2004 Group Manager (Earth moving Equipment, Machine shop, Boiler shop, Electrical Services) Project Manager – Feasibility Study and Implementation of Block Making Plant to agglomerate chrome ore fines.

Mar 2000 – Dec 2000 Mechanical Maintenance Engineer (Furnaces) (Arc and Induction Furnaces and Associated Equipment).

Oct 1998 – Feb 2000 Transport & Materials Maintenance Manager (Materials Handling Plants, Alloy Processing Plant, Alloy from Slag Plant, Mobile Equipment).

At Wankie Colliery Company: Jan 1994 – Oct 1998 (4 years 10 months)

Wankie Colliery Company, now called Hwange Colliery Company is a coal mining, processing and coking company in Zimbabwe.

Jun 1996 – Sept 1998 Section Engineer (Opencast Mine)

Jan 1996 – May 1996 Assistant Projects Engineer

Jan 1994 – Dec 1995 Trainee Engineer (Completed learner-ship covering underground, open cast, coal processing, coking plant, central services, marketing and administration departments of the company)
