CONEXIG assists public and private sector clients on matters related to infrastructure, engineering and construction. We provide services to help clients avoid and resolve complex matters throughout their lifecycle of value creation, maintenance or enhancement. We support our clients proactively from project conceptualization, through planning and construction, to operations and compliance, as well as retrospectively with audit and forensic based services.

CONEXIG has a team of more than 100 multidisciplinary and specialized experts, including both in-house and allied professionals. Our professionals bring a wealth of experience and expertise to our projects, and deliver the best possible results for our clients. We have a proven track record of success in a variety of sectors, including infrastructure, engineering, and construction.

We have a geographic presence across the globe, with offices in the United States (Miami-FL, Houston-TX and New York-NY), Mexico, Colombia, Ecuador, Peru, Chile, Brazil, Argentina, Portugal, Spain, Angola, South Africa, and Australia.

CONEXIG operates around the world in a wide range of sectors in the construction industry, including:

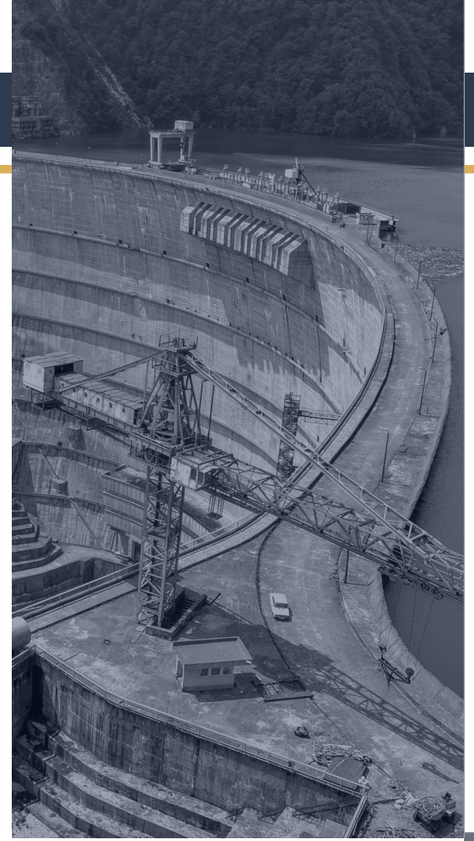
- E-Discovery
- Hosting
- Production
- Digital Transformation
- Building Information Modeling (BIM)

ENERGY

- Generation
- Transmission
- Distribution
- Solar
- Wind
- Co Generation
- Hydroelectric

CONEXIG provides comprehensive solutions that assist clients meeting their development goals of time (schedule), budget and quality while still respecting the people and the environment.

Our team has extensive experience in assisting clients in the development of complex projects throughout their lifecycle, and supporting them through an ongoing process that begins with the analysis and evaluation of the owner's RFP and continues until the contract is closed, when all contract obligations have been fulfilled. This includes virtually all aspects of contract and project management, including PMO and BIM related services, with the aim of preventing differences that cannot be resolved throughout the execution of a project.



SERVICE LINE:

PROJECT SUPPORT SERVICES

SERVICE LINE:

CLAIMS & DISPUTE RESOLUTION

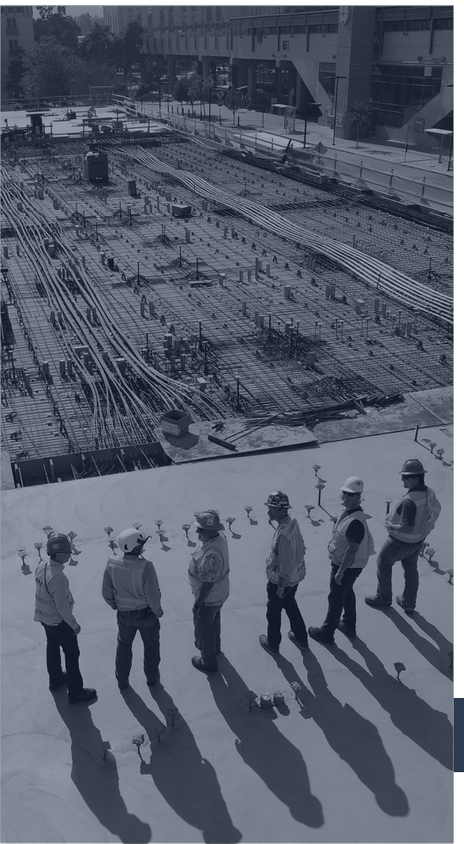
At CONEXIG we support clients to fully understand their contractual technical rights and obligations and in dealing with these, the most efficient and effective way. We examine and identify in detail the cause-effect relationship around potential areas of disagreement and isolate them presenting the logics behind potential claims as well as the fact that support them.

Through these analyses we assist clients understanding entitlement and causation and in the quantification of the effects of identified causes. Our multidisciplinary and experienced teams provide invaluable help to clients in presenting, negotiating and resolving their disputed claims in all types of dispute resolution mechanisms including mediation, arbitration, litigation (locally and internationally) and dispute boards before the court. We have had experience related to the international arbitration rules of the International Chamber of Commerce (ICC), AAA, ICDR, CAM Santiago, AMCHAM-SP, CCL Arbitration Center – Lima Chamber of Commerce, Chamber Arbitration and Conciliation Center of Commerce of Bogotá (CCB), CAM-CCBC, CIADI, among others.

We are recognized experts in the quantification of damages related to EOT/delays, cost (Quantum), economic damages, professional care, fraud and others.

SERVICE LINE:

GOVERNANCE, RISK, FRAUD & COMPLIANCE



We assist clients in our chosen industries to navigate the challenges of managing risk in both proactive and reactive ways. Companies in the infrastructure, engineering and construction industries often struggled to deal with compliance requirements and issues and lack the experience to implement appropriate corporate governance mechanisms and controls to help them manage risks (including fraud related risk). All these elements are interrelated.

CONEXIG leaders have had successful exposure to these aspects of management of numerous companies globally, and have developed a deep knowledge and understanding of the specific requirements and reality of the industries and countries in which we operate. Our expertise is aligned with the best practices and requirements such as the FCPA (Foreign Corrupt Practices Act), the COSO (Committee of Sponsoring Organizations of the Treadway Commission), ISO 31000, ISO 37001 and others.

This successful experience positions CONEXIG to uniquely help our clients with these challenges.

We assist clients transforming and improving their management policies, processes and procedures. Our management consulting team assists clients to evaluate, justify, plan and deliver their capital and change management projects, focusing in the increase and delivery of value for money. These services help clients from concept and business case development, through change management and ongoing support and delivery of the most complex matters in projects development and operations in capital intensive industries.

CONEXIG provides leading edge expertise for business process redesign and improvement as well as change and performance management, procurement and business process mapping. Most of our services here include a PMO and some of the common areas of focus include KPIs generation and review as well as productivity and supply chain improvement.
